SAFETY AUDIT & FUNCTIONAL EXCELLENCE

Crane **SAFE** Sampling Program

Overview

**Ensuring Safe, Compliant,
and Effective Grab Sampling
for your Operations**

Powered by Dopak and Texas Sampling.

About Crane SAFE Sampling

The Crane SAFE Sampling Program, powered by Dopak and Texas Sampling (TSI), provides expert on-site audits to improve the safety, environmental compliance, and efficiency of sampling systems in refineries and (petro)chemical industries. Our team assesses current sampling points, offers tailored system upgrades, and ensures compliance with the latest safety standards, including no contact with process fluids and no emissions to the environment. With decades of expertise and a global installed base, Dopak and TSI bring proven reliability in high-risk environments, delivering precise recommendations and professional reporting to help optimize your operations for long-term success.

Competitive Advantage

DECADES OF EXPERTISE

Both Dopak and TSI have extensive experience in providing cutting-edge, safe, and reliable closed vent sampling solutions for critical industries.

LARGE INSTALLED BASE

Thousands of systems installed worldwide, providing unmatched familiarity and expertise in refining and (petro)chemical industries.

PROVEN PERFORMANCE

Dopak and TSI sampling systems have a track record of safety, quality, and improved representativity in high-risk environments, making them the trusted choice for customers looking to upgrade or optimize.

UNPARALLELED SUPPORT

With Crane's strong global presence and network of factory-authorized representatives, you can count on expert advice, service, and follow-up at every step.

Why Choose SAFE Sampling

Dopak and Texas Sampling are trusted leaders in the field of process "grab" sampling systems, offering reliable, safe, and efficient solutions for fluid and gas sampling--both brands deliver superior quality and innovation, ensuring accuracy and safety in the most demanding environments.

PROTECT OPERATORS & THE ENVIRONMENT

Dopak and TSI's solutions minimize risks while delivering reliable sampling results and contributing to reducing environmental emissions.

COMPREHENSIVE AUDITS

Crane's SAFE Sampling Audit program ensures your systems meet today's safety and compliance requirements.

CONSULTIVE APPROACH

Receive tailored recommendations to upgrade or optimize your current systems, improving safety and quality.

CERTIFIED EXPERTS

Audits are performed by Crane specialists or factory-authorized representatives.

HOW IT WORKS

- > **Schedule an Audit**

Crane will confirm an audit date and provide a detailed program overview.
- > **On-Site Evaluation**

Crane's team will assess your current systems, identifying any gaps in safety or efficiency.
- > **Custom Report**

Customer receives full audit report, outlining potential upgrades and solutions.
- > **Continuous Support**

Keep your sampling systems up-to-date with ongoing follow-ups.
