

## Liquid sampler c/w air driven pump and carry on frame

CRANE

This DPM liquid sampler in system purge configuration allows the product being sampled by means of a built-in membrane pump. The liquid medium is pumped continuously through the sampler to ensure the retrieval of a representative and contamination free sample. The carry on frame c/w flexible hoses and quick connects create a portable sampler ideal for sampling liquids on board ships.

### BASIC SPECIFICATIONS

Material	SS316(L).
Sleeve Type	500cc sleeve with bottle retaining clip. Larger/smaller sample size available.
Needle Assembly	Single piece VTO needle assembly with vent to outlet connection 1/4" F NPT. Process/Vent needle ID: 1.35 mm.
Valve	Three-way ball valve. Type dependent on the product to be sampled.
Operation	Manual.
Connections	Process in/out: flexible hoses with quick connect couplings. Vent: 1/4" F NPT, c/w adapter suitable for A2 gas filter. Air inlet pump: 1/4" F NPT.
